

## Customer information

Langenthal, 13. December 2024

Declaration of conformity to the REACH Regulation (EC 1907/2006), candidate list of SVHC dated 07 November 2024

Declaration of conformity to the RoHS Directive (2011/65/EU, including 2015/863/EU)

Dear Customer,

As a manufacturer of linear guideways, racks, pinions, gearboxes, linear and rotary axes and gantry robots, we produce items (Article 3) according to the REACH Regulation.

Compliance with the code of conduct and current legislation is ensured by Güdel's very own Compliance Council, which manages and monitors a compliance management system (CMS) introduced for that very purpose.

We hereby confirm that all our suppliers and business partners have been instructed to supply Güdel exclusively with products for further processing, installation or intermediate trade that do not contain any ingredients from the candidate list set out in the REACH Regulation in a concentration of > 0.1% by mass and do not contain any substances the use of which is restricted by Annex XIV or XVII of the REACH Regulation or in accordance with the RoHS Directive.

In the event that, contrary to our instructions, products nevertheless contain a substance on the candidate list in a quantity greater than 0.1% by mass, suppliers were explicitly reminded of their duty to inform Güdel AG of the SVHC candidate(s) according to Article 33 (1) of the REACH Regulation. If no specific information is required for safe use, the name of the substance should be mentioned at the very least.

As far as we are aware at present, the following substances from the candidate list of SVHC (dated 07 November 2024) set out in the REACH Regulation may be included.

Substance REACH SVHC with a concentration of > 0.1% by mass	CAS no.
Imidazolidine-2-thione	96-45-7
Cadmium oxide (CdO)	1306-19-0
Triphenyl phosphate	115-86-6
N,N-dimethylacetamide (DMAc)	127-19-6
Bis (2-ethylhexyl) phthalate (DEHP)	117-81-7
Lead	7439-92-1

Thank you for your attention.
