

Guidelines for occupational safety

These guidelines for occupational safety supplement company policy (doc 00299) and provide more detail in the form of principles of action for the safe execution of our work.

I will only carry out safe work!

I will abide by the vitally important rules and insist on their application.

I will say stop in the event of unsafe working situations.

The vitally important rules have been taken from the Swiss National Accident Insurance Fund (SUVA) and cover all relevant areas of our operations:

				
Avoid crashes	Use safe thoroughfares	Use appropriate ladders	Avoid asbestos dust	Secure objects
				
Use professionals for electrical work	Switch off and secure systems	Wear protective equipment	Operate machines as directed	Handle chemical products safely
